September 20th 1974

The Mayor of Boston, Mass.
Boston, Mass.

Dear Mayor:

You have my most profound sympathy. I wish that I could help you, but that is "beyond the reach of my cabletow". I know a little something about your surroundings, and the whirlpool in which you find yourself. But the entire country is experiencing that whirlpool.

I married a New England woman, a direct descendent of those who first got off the Mayflower. She was a graduate of Smith College. We visited New England many times. I also carefully read Thurslow Adams' "March of Democracy". I also visited Salem where they rode broomsticks and burnt witches. An Old New England pioneer showed me a "scarlet letter" or one of the things he said they made the imprint of the letter on the forehead of some woman who had a little of that which most men seem to want, passion.

Old man John Sargent, President Coolidge's Attorney General, took me the Grandson of a Confederate Rebel under his arm, and several times when I was in New England and he was at home in Vermont, I visited him. I am sorry for you because you are not responsible for the circumstances in which you now find yourself.

From the record, and from other contacts, I learned that those Pioneer New England Yankees had a lot of sense. It is too bad that some of their descendants did not retain that faculty. Those old Yankees went over to Africa and traded a string of beads for Black Thick Skulls and brought them to New England to work for them. Over the years they made a thorough experiment to find out the capacity of those black thick skulls. They found that they just did not have it. So they traded them to the South for cotton.

Now, I came in on the other end of the experiment. My Fifth great-grandfather landed at Jamestown, Va. in 1642. He and his descendants were the ones who traded cotton for the thick black skulls. The respective climates of the two peoples in New England and the South, were such, the South could drag along with the thick black skulls and have them earn apart of their keep. My wife, though a died in the wool Yankee, detested the Niggers__she called them. Not because their skins are black and their skulls are thick, because of their sorriness. When she paid one of them a dollar she expected a dollar and four cents in return. If I could get ninety cents value back for my dollar paid him I was perfectly satisfied. Now, you can never change the nature of those New England Yankees and you can never change the nature of us Southern Rebels. It would be a worse job than trying to make Catholics and Protestants of Ireland love each other. They both claim to be Christians, but there is a difference in their Christianity. Are you Catholic or Protestant? I am a Baptist preacher.

Blacks and whites were getting along fine together in this country until World War I came. Up until then the Yankees could bring boat loads of Hunkies and others over here from Europe to do their hard work. When they could not get them during the war, they came South and enticed hundreds of thousands of black thick skulls to go North to do their work, promising them everything Solomon ever enjoyed. After the war

when the Yankees could get more efficient white labor from Europe, they pushed the "NIGGERS" (THIS IS A TERM OF AFFECTION) into the slums and ghettos. This is when your trouble started in the North. The thick black skulls continue to go North, for their relatives wrote them, that " up North you can go anywhere a white person can go, and you can do anything a white persons can do". They failed to add " ACCORDING TO OUR CAPACITY". So they continued to pour into the North " to do what the whites could do and go where the whites could go". Their numbers placed an impossible burden on the cities of the North.

Then came the Communist conspiracy to arouse their animal hatred and viciousness. The North got something by the tail they did not know how to turn lose, and they still have it. They rushed to the peanut politicians, many of them the product of union Labor Goons, shouting "save oh save us lest we perwish", and all kinds of quack remedies were enacted by the Congress, appropriating billions of dollars worth of social and economical aspirin.

The Yankees said "one way we can stop this migration North and that is to bring about the MIXING OF THE RACES in all aspects of life in the South. They did not dare try to force it, for they had been stung by that yellowjacket once before. They asked "what shall we do", Political quacks like Franklin Roosevelt and Lyndon Johnson said "we can bribe the South to accepting it". And that is what they have been trying to do ever since. But the remedies must apply fairly equally North and South. They overlooked the fact, that Intelligence has always controlled ignorance and always will. The South knowing a great deal more about the fundamental nature of the black thick skulls have done and can do a much better job handling the Mixing problem than the North. And the Communistic conspirators are much more active in the North than in the South. Our religious nature down here makes us much more immune from the Communistic conspiracy and the influence of the Atheistic Labor Goons of the North. I am putting the truth on the table and let you look at it.

The biggest political fraud the South ever had was Lyndon Johnson. Whatever he did to force Mixing of the races, was hypocrisy of the whole cloth. His wife owned a large plantation in Alabama near where I was reared. The sorriest shacks on a plantation in Alabama were on her farm. Johnson did not shed any tears over the conditions her tenants lived in. John F. Kennedy picked him as his Vice President candidate in order to carry the South. Had John F. not done that he would be alive today, and so would his brother Robert, and Ted would not be imprisoned in a cell of sorrow today. The Yankees loaded the gun for Johnson to shoot, but it backfired.

Not until the firebox of Hell freezes over will the white people of this country, accept FORCED MIXING of the black thick skulls and the whites. Every intelligent white person would like very much see the Negroes of this country to develop their maximum capacity for the joys of civilization. We in the South were making great strides in that direction before the paragons of force appeared on the scene. For ten years I served as Florida attorney for the NAACP, along with Drs Lud Spivey of Southern College Trustee Harry Moore and Dr. Hamilton Holt of Rollins College, as trustees. We tried to do just what Daisey Douglas Bar had

in mind when she gave birth to the NAACP, VIZ: Advance their best interest, and not to try to mix them by force, and make haters of them, while at the same time down grade public education and the efficiency of public and private services in this country.

This forced mixing will prove a greater farce and failure than did Herbert Hoover's Prohibition "experiment Noble in Purpose". Anytime an experiment which is a rank violation of God's Laws, and even a kindergarten mind should know it, is not an experiment. The New England Yankees experiment with the black Thick Skulls before the Civil War, and found them seriously lack in capacity compared with the white man.

Martin Luther Kind flirted with that Communistic Conspiracy for sometime, Then when his old Southern Baptist religion would not let him go all the way, and be the leader to stir up hates and gorilla warfare in this country, they found the way to have him liquidated. The reason his assssin does not tell the truth about King's death he knows that that conspiracy would find some way to liquidate him.

Now, the Klu Klux Klan sticking its nose into the Boston matter is worse than the Forced Mixing. I have denounced that outfit since it first stuck its head up back in the 1920 s. During all the years when any aspirant had to have its blessings to get elected to public office, I denounced it. They brutally beat a young Catholic Boy in Lakeland, Florida because he visited a girl they did not want him to visit. The States Attorney refused to prosecute the outlaws who beat him. I volunteered my services, and I prosecuted them with all the power at my command. They wrote me threatening letters and burant a cross in my yard, but I went after them with gloves off, and I broke up the Klan in Polk County. I would like to see every one of them who goes to Boston thrown in jail for six months, We do not need forced mixing in this country, and we do not need the KKK. The race issue will never be settled by politicians, and it will never be settled by outlaws. It can be settled, and it will finally be settled by the Golden Rule. I pray that that Rule will guide your people in Boston.

Yours Truly
